# SPECIFICATIONS

## General

The **Town of Fox Lake**, the issuer of this bid proposal, shall hereinafter be referred to as "the owner".

## Insurance

The contractor shall furnish and deliver to the owner a certificate of insurance for worker's compensations and an umbrella certificate of liability and property insurance in the minimum amount of three million dollars before beginning work and shall notify the owner immediately of any cancellation or change in insurance coverage.

## Traffic Control

The contractor will be responsible for all traffic control, including furnishing and maintaining all signs, flags, flag-persons, barricades and lights where required, to protect the safety of the traveling public, all in accordance with the FEDERAL HIGHWAY ADMINISTRATION AND WISCONSIN DEPARTMENT OF TRANSPORTATION **Manual on Uniform Traffic Control Devices**, 1988 edition and its supplements. All work will be done under traffic unless otherwise directed by the owner.

## Completion

All work is to be completed prior to October 15.

## CRUSHED AGGREGATE BASE COURSE

### Crushed Aggregate Base Course or Shoulders

- A. This item shall consist of supplying, placement and compaction of a dense compacted base course composed of one or more courses or layers of course aggregate, either crushed gravel or crushed stone, fine aggregate and binder or filler blended as necessary to produce an intimate mixture of the required gradation and stability, constructed on the prepared foundation in accordance with the specifications and in reasonably close conformity with the lines, grades, thicknesses and typical cross sections shown on the plans or established by the Owner.
- B. Crushed aggregate shall be in conformance with Section 304 of WisDOT Standard Specifications, 2011 Edition. Materials shall conform to gradation No. 2 or 3.
- C. Basis of payment shall be the contract unit price per Ton for crushed aggregate base course.
- D. All base course must have weight tickets from a certified scale.

## PULVERIZE AND RELAY ASPHALTIC PAVEMENT & BASE COURSE

- A. This work shall consist of constructing base course utilizing in-place pulverizing and relaying of the existing asphaltic surface and base course over the roadbed as shown on the plans and as hereinafter provided.
- B. The existing asphaltic surface shall be pulverized full depth (4) inches and to a minimum of 97 percent passing a 2-inch screen. The existing crushed aggregate base course shall also be pulverized to the depth shown on the plans (or as directed by owner) and mixed with the asphaltic material.

Immediately after pulverizing, the material shall be placed to the specified width as shown in the bid documents or as direct by the owner. The laydown shall be accomplished using a grader.

The relayed material shall be immediately compacted in the following sequence: first with either a rubber tired roller or vibratory pads foot roller, and second with a vibratory steel roller. Water shall be added prior to and during compaction as required. Each layer shall be compacted tot he extent required for Standard Compaction in Section 304.5 of the standard specifications. The compaction equipment shall be as follows:

For a compacted depth of pulverized materials, up to 6-inches, compaction equipment shall be in accordance with section 304.4 of the standard specifications.

For a compacted depth of pulverized material, greater than 6-inches and up to 8-inches, a minimum 25 ton rubber tired roller with 90 psi tire pressure or 25,000 lb. Pads foot vibratory roller, and a minimum 8 ton vibratory steel roller shall be used.

For compacted depths greater than 8-inches, split lift compaction according to the above described methods will be required.

At the completion of each working day, the ends of the pulverize and relay asphaltic pavement and base course shall be as adjacent as practical by both traffic lanes.

- C. Method of Measurement. Pulverize and relay asphaltic pavement and base course will be measured by the square yard of relayed material according to the finished typical section width and details shown on the plans.
- D. Pulverize and relay asphaltic pavement and base course, will be paid at the contract unit price per square yard with price shall be full compensation for pulverizing, windrowing, relaying, adding water, compaction and all labor, tools equipment and incidentals necessary to complete the work in accordance with the contract.

**PROPOSAL**

Submitted by the undersigned bidder to the **Town of Fox Lake**, Wisconsin in accordance with the advertisement inviting proposal to furnish and deliver all materials, and to do and perform all work for **2016 Roadwork projects** designated in accordance with the Contract Documents.

The undersigned bidder, if awarded the contract, agrees to complete the work prior to October 15, 2016.

The undersigned bidder, submitting this proposal, hereby declares and agrees to be bound, and to perform the work in accordance with all terms, conditions and requirements of the within and foregoing proposal, the contract, the applicable specifications, the special provisions and the advertisement for bid are made a part hereof as fully and completely as if attached hereto.

# ASPHALT CONCRETE

## **Construction Procedures**

### **Production**

The contractor shall provide adequate trucks and paving train equipment to assure a continuous paving operation and avoid frequent delays.

After the asphaltic concrete paving has started, the contractor shall proceed to complete the project at the earliest possible date. If the contractor should determine it necessary to stop the paving operation, the contractor shall make a request to the owner for permission to stop work.

### **Asphaltic Concrete Pavement Materials**

The asphalt cement shall be performance graded **PG 58-28**. The contractor shall provide a current mix design that will be used on the project.

### **Asphaltic Concrete Basis of Payment When by the Ton**

An asphaltic pavement mixture of the type or types included in the contract shall be measured by the ton of mixed aggregates and bituminous material laid and compacted in place. The price shall be full compensation for producing, furnishing, and placing all materials including asphalt cement, and for all labor, tools, equipment, testing and incidentals necessary to complete the work.

Payment will be made only for supplied material accompanied by a ticket containing the following information.

1. Ticket number, date and time
2. Type of material
3. Net weight

Copies of the tickets shall be given to the owner. Load tickets must be from a certified scale.
